

Innovative Construction Services

Innovative Construction Services, Inc. (ICS) is a subsidiary of RDC Limited General Contractors, a custom home builder in Indiana since 1989. ICS was established in 2004 to focus on different areas of business, and has grown rapidly since that time, more than quadrupling annual revenues in just three years.

In recent years, ICS has been building two to three custom new construction homes annually. The firm's recent projects have also included new commercial and institutional buildings, as well as multi-family and commercial renovations. In addition, ICS has substantial experience in the affordable housing arena, working with both government agencies and not-for-profit groups.

Under the leadership of founder and president, Debra Underwood, ICS has developed a reputation for quality workmanship and its ability to bring projects to completion on time and within budget.

ICS is certified as a Women Business Enterprise (WBE).
